Public Health England

Table 7: Number & rates of chlamydia diagnoses in England, 2003 - 2012

Data are presented by gender & age group

Data type: service data

Data type:

Service data:	Data represent STI diagnoses among people accessing services located in England i.e. data may include people who are resident in England, Wales, Scotland, Northern Ireland or abroad

Contents:

Information

Notes:	Information detailing the contents of the data presented
STI Code Groups:	Definitions of STI conditions presented
GUMCAD Submissions:	GUMCAD data availability for 2012
Population Data:	ONS population data

Data

Chlamydia:	Diagnosis numbers & rates by gender & age group

IMPORTANT NOTE: 2012 CHLAMYDIA DATA ARE NOT COMPARABLE TO DATA FROM PREVIOUS YEARS

- **CTAD:** Chlamydia data from 2012 include community data from the new surveillance system, CTAD.
  - The introduction of CTAD has resulted in a change in the numbers/rates of chlamydia diagnoses from community services. This change is likely to have a larger effect on data at local geographies.
  - Community data now includes all age groups, not just those aged 15-24 (as in previous years).
- **Chlamydia diagnosed previously elsewhere:** From 2012, all chlamydia diagnoses at GUM clinics that were previously diagnosed at another service have been removed from diagnosis numbers/rates.

Please see the 'Notes' page for further details on data presented.

Data supplied by:

Public Health England
Chlamydia Testing Activity Dataset
Genito-Urinary Medicine Clinic Activity Dataset (GUMCAD)
National Chlamydia Screening Programme (NCSP)

Public Health England

Table 7: Number & rates of chlamydia diagnoses in England, 2003 - 2012

Data are presented by gender & age group

Data type: service data

Notes on using data tables:

1. Data are sourced from GUM clinic KC60 returns (2003-2008) & GUM clinic GUMCAD returns (2009-2012)
2. No data estimation was done (see 'GUMCAD Submissions')
3. Chlamydia test & diagnosis data from community services are sourced from NCSP & 'Non-NCSP/Non-GUM' services for 2008-2011 and include only those aged 15-24. From 2012, chlamydia test & diagnosis data are sourced from CTAD and include all ages. As a result, chlamydia data from community services from 2012 are not comparable to data from previous years. See link below for further details on chlamydia data from community services & for additional data on chlamydia testing coverage, positivity & diagnostic rates (for those aged 15-24).
   http://www.chlamydiascreening.nhs.uk/ps/data.asp
4. Chlamydia diagnoses from GUM services that were reported as 'previously diagnosed at another service' (C4X, C4OX & C4RX) have been excluded from 2012 data (only). These diagnoses have been reported via CTAD & are already included in the community services chlamydia data. *As a result, GUM services chlamydia data from 2012 are not comparable to data from previous years*
5. Data presented follow calendar years (Jan-Dec), not financial years (Apr-Mar)
6. Data represent the number of diagnoses reported & not the number of people diagnosed
7. Data represent STI diagnoses among people accessing services located in England
   i.e. data may include people who are resident in England, Wales, Scotland, Northern Ireland or abroad
8. SHHAPT code suffixes (M, O, R, Q & X) are presented by the primary code (except for chlamydia previously diagnosed at another service - please see note 4)
   e.g. 'rectal chlamydia (C4R) is presented as 'chlamydia' (C4)
9. Prior to 2009, data for complicated chlamydia diagnoses (KC60 code: C4B) are not available by age group. Therefore, these data are included in the “unknown” age group category for 2003-2008
10. Data on diagnoses reported with an unknown gender may be included in the diagnosis total
11. Rates are calculated using population estimates provided by ONS.
    Rates for 2003-2010 are based on ONS population estimates from the 2001 census
    Rates for 2011 & 2012 are based on ONS population estimates from the 2011 census
    Rates for 2012 have been calculated using ONS population estimates for 2011
12. Rates for 2011 & 2012 may not follow trends from previous years due to the updated ONS population estimates from the 2011 census
13. Rates for chlamydia diagnoses from community services are calculated using population estimates for those aged 15-24 (2008-2011) and population estimates for those of all ages (2012) - see note 3
14. Age group category '<15' includes those aged 13-14 only
15. Age group category 'other' includes those aged 0-12 and those with an unknown age
16. Age group category '65+' includes those aged 65-99 only

Glossary:

CTAD:	Chlamydia testing activity dataset
GUM:	Genito-urinary medicine
GUMCAD:	Genito-urinary medicine clinic activity dataset - STI surveillance report
KC60:	STI surveillance codes/report
NCSP:	National chlamydia screening programme
ONS:	Office for national statistics
SHHAPT:	Sexual health & HIV activity property types - STI surveillance codes
STI:	Sexually transmitted infection
