

**Health Protection Agency and Nottingham University Division  
of Primary Care  
Collaborative National Surveillance Project**

**Appendix A – QFLU data by Primary Care Trust  
Bulletin No. 109**

**Key Indicators: Rates by Primary Care Trust (PCT) for week commencing  
11<sup>th</sup> December 2006 – Week 50 of 2006.**

**Notes to accompany all tables:**

- **Data are presented by Primary Care Trust in England or the equivalent in Wales, Scotland or Northern Ireland.**
- **Currently data are presented using the PCT boundaries in existence prior to the recent reorganisation on 1 October 2006. Work is in progress to map the database to the new PCT boundaries.**
- Only practices with data for the entire week have been included in the analysis for the week commencing 11<sup>th</sup> December 2006 and PCTs where there are less than 3 practices reporting are excluded from the tables to ensure confidentiality of participating practices.
- **Cells highlighted in yellow are considered to be a significantly high result.** Coded yellow if both the upper and lower confidence limits are above 100. The Standardised Incidence Ratio (SIR) is calculated using the UK as the standard population.

**Table 1: Influenza-like illness and upper respiratory tract infection – rates per 100,000 practice population – Week 50 of 2006**
