Insight Health Limited – ChloroPrep

Basic research and development, validation and recent in use evaluations have shown benefits that should be available to NHS bodies to include as appropriate in their cleaning, hygiene or infection control protocols (recommendation 1).

ChloroPrep® is an FDA approved; topical antiseptic containing historically accepted biocidal actives and has been demonstrated through clinical trials to be effective. It is presented in a sterile single-use applicator.

Supporting data of the product's efficacy is comprehensive and includes a number of published reports in the Journal of Infusion Nursing, British Journal of Infection Control, Journal of Clinical Microbiology, Journal of Bone & Joint Surgery, Infection Control and Hospital Epidemiology and the Journal of Hospital Infection attesting to its performance. This product is likely to support the reduction of central-line associated blood stream infections.
