## PRODUCT INFORMATION

### FEPTU DVD

In December 2006, FEPTU made a DVD – **Proficiency Testing Explained: Food Microbiology**. The DVD was made partly as a promotional tool but also provides information about proficiency testing and why it is so important that food microbiology laboratories report accurate results. We announced the DVD's availability in our Newsletter in December 2006 and some participants asked for a copy. They have found the DVD to be useful for staff training and helping to explain to clients why they invest so many resources in products to maintain quality, such as proficiency testing schemes.

In order to allow us to process your orders as efficiently as possible, please complete and return this form to secure your copy.

The DVD will play in five languages: English, Spanish, Italian, Portuguese and Mandarin.

There is a postage and packing charge of **£3.00** for laboratories in the UK and **£7.00** for overseas laboratories.
